

John Duval is a Principle Associate for SMA Inc. based in Irvine, CA. John provides SMA clients with EVMS implementation support and EIA-748 compliance guidance on large complicated government contracts. He also specializes in scalable EVMS solutions and optimizing the application of EVM.

Previously, as Vice President of Integrated Program Planning & Controls (IPP&C) at SMA, he lead the firm's largest practice area of planners, schedulers, cost estimators, and earned value management consultants. His role included supporting Business Development and Operations by hiring and deploying the most talented subject matter expert's necessary to implement and maintain best of breed IPP&C solutions for SMA Clients.

Prior to joining SMA in August 2017, John was the corporate EVMS Focal Point for CSRA: a spinoff/merger of SRA International and Computer Sciences Corporation's North American Public Sector (NPS): a multi-billion dollar organization focused on Federal and State government contracts in North America. There he implemented a centralized an EVM Organization of 45 Schedulers and EVM experts who performed run and maintain functions on approximately 31 contracts. John also directed the EVM Core Team comprised of EV/Scheduling experts who focused on governance and oversight, proposal support, policy management, IBR support, software systems, methodology and tool training, new contract implementations, internal surveillance, and preparing contracts for DCMA system validations and joint surveillances.

Employed with CSC for over 30 years, John's experience in applying Program Planning and Controls to large complex federal government contracts is extensive. Over the years, he supported clients in many of the civil agencies, as well as, the Department of Defense. The nature of the work varied greatly from traditional software development to large O&M service contracts. While performing the role of EVM Manager on numerous contracts, John has facilitated countless IBRs and over 25,000 status/VAR reviews. He has built complex EVM software systems from the ground up, chaired configuration control boards for COTS applications, and personally lead major implementations of EVM for both NASA, Army, and the USAF. His experience includes teaching thousands of CAMs, program managers, and PMO staff how to tailor EVM in effective and efficient ways, while maintaining compliance with EIA 748.

As the SMA corporate representative to the National Defense Industrial Association (NDIA) Integrated Program Management Division (IPMD), John currently serves on the Board of Directors promoting industry best practices and effective federal government collaboration. John is a widely recognized subject matter expert in scaling the application of PP&C and EVM principles to sustainment and services contracts. He frequently presents at the IPM Workshops, and EVM World Conferences.

John graduated Cum Laude with a BS in Industrial Technology from the University of Maryland in 1983. He held an Earned Value Professional certification and holds a certification in Configuration Management.
