Dr. Guo is a Program Director at National Science Foundation (NSF). She joined NSF in 2017 to support the development of the NSF guidelines for the EVMS implementation and oversight reviews for the large facility projects. She currently oversees mid-scale research infrastructure programs. Before joining NSF, she led the development of guidelines for EVMS implementation in large science projects in Brookhaven National Lab. She managed large-scale science projects involving domestic and international collaborations, such as the High Luminosity LHC ATLAS Upgrade project and US LHC ATLAS Phase I Upgrade projects. Prior to her work in project management, she did research work in the areas of High Energy Nuclear Physics and Quantum Chromodynamics. Xiaofeng has Ph.D. degree in Physics and received an NSF ADVANCE Fellowship award for her research in 2004. She also has PMP certification.
